1	Prof Manfred Green	Implementation of Artificial Intelligence tool for epidemiological investigations of resistant microbial: Contact tracing of patients exposed to MDR organisms in a general hospital	MPH	in Progress	Study proposal

11. Miscellaneous

Non

12. Professional Experience

13. Non-Academic Community Service (Volunteer Activities, pro-bono)

Community contribution: I am volunteer in physicians for human rights association by participating in conferences and education activity for nurses in the west bank.

Between August-October 2020 I had to be in a volunteer activity in Uganda, this program aborted due to the COVID-19 pandemics and the limitation of health care worker leaving the country. I hope that I can achieve this dream during the coming years.

L. Summary of my Activities and Future Plans

I am a specialist in Infection control, preventive medicine and hospital epidemiology. More than 25 years' experience in this field in clinical setting, research and academic aspects. Before six years (Feb / 2019) the head of the division of governmental hospitals appointed me as consultant for the office. Since this appointment, I create three infection control forums for general, psychiatric and geriatric governmental hospitals. My job includes hospital visit, meeting with hospital management, mapping gaps in infection control staffing, activates and facilities. With the department of business intelligence (BI) of the ministry of health, I start recently a project to build dashboard of infection parameters for hospital management.

For the developing, the electronic medical file (CAMELION) for governmental hospital I formulate and costume the elements related resistant bacteria, Isolation and invasive instruments checklists.

Preparation and dissemination of infection control and hospital epidemiology E-learning for health care workers, governmental hospitals, ministry of health. (2023)

I am proud to have been selected, through a competitive process, for the Mandel program for medical leadership in the northern district of the country. The program started at 4 November 2025 until July 2026.

In my academic experience, I will continue teaching as senior lecturer, continue leading research study an cooperate with my colleagues in the college and hospital. After completing the Mandel foundations medical leadership training program, I will become part of an alumni network that will collaborate in the Northern district of Israel to promote health, well-being, and sharing peace living.
